MEMORANDUM FOR THE RECORD

SUBJECT: MATS Shuttle Maintenance

25X1A6a

While at [REDACTED] on 7 November 1955, the Base Commander reported to me that one of the two maintenance men supplied to MATS from San Bernardino [REDACTED] for the shuttle was replaced by an inexperienced man. This change has resulted in insufficient care of the G-54 and consequently several times the aircraft has been delayed in taking off because of mechanical failure. The Base Commander considers this a serious matter and asks Headquarters assistance in contacting Colonel Berg to effect pressure on San Bernardino to supply MATS with competent maintenance personnel.
